COVID-19 Decision Tree

More common: fever greater than or equal to 100.4°F, new onset and/or worsening cough, difficulty breathing, new loss of taste or smell.
Less common: sore throat, vomiting, diarrhea, chills, muscle pain, excessive fatigue, new onset of severe headache, new onset of nasal congestion or runny nose.

**ONE “less common” symptom**
- Evaluate symptom and determine if well enough to remain in school or at work
- Well enough to attend or remain in school or at work
- Stay home or send home and consider evaluation from a health care provider and/or COVID-19 test
- Receive NEGATIVE COVID-19 test result
  - OR
  - Complete 14 days of quarantine before returning to school or work.
  - OR
  - Receive POSITIVE COVID-19 test result
    - OR
    - Symptoms develop

**Siblings and household contacts do not need to stay home or quarantine**

**ONE “more common” symptom OR TWO “less common” symptoms**
- Notify supervisor or instructor. Stay home or send home. Complete COVID-19 Reporting Form.
- Siblings and household contacts remain at home or are sent home
- Does not seek evaluation and/or COVID-19 test
- Receive POSITIVE COVID-19 test result
  - OR
  - Siblings and household contacts return to school or work

**For people who are a “close contact” with someone who tested positive for COVID-19**
- A close contact is a person who was within 6 feet for at least 15 minutes of someone who is infected.
- Notify supervisor or instructor. Complete COVID-19 Reporting Form. Stay home from all activities for at least 14 days following the last contact with the positive case.
- Siblings and household contacts do not need to stay home or quarantine

**For people who test positive for COVID-19 but are asymptomatic**
- Notify supervisor or instructor. Stay home or send home. Complete COVID-19 Reporting Form.
- Monitor for potential symptoms for 10 days before returning to school or work.
- If symptoms develop follow green or blue track above as appropriate.
